

KREOBOOST

BOOSTS PLANT'S IMMUNE SYSTEM

Bacillus amyloliquefaciens H201

KREOBOOST contains plant growth promoting bacteria that increase plant yield and boosts the plants immune response in responding to plant pathogens.

Secretion of auxin that encourage plant growth promotion.

Secretion of metabolites that triggers the plant immune system to ward off fungus and bacteria invasion.

Kreoboost Trials in Strawberries – Turkey. Application through drip irrigation.

"With only one application on strawberries the flowering was greater, the fruit set and growing was excellent," the farmer said.
